- For schedules and to register visit: <https://goo.gl/et9rK1>

## IGNITE EDUCATION at the Expanded Learning Institute!

**Day One – Wednesday, August 2: Keynote Presenter  
RONI HABIB, Founder of EQ Schools**

**RONI HABIB** – As the founder of EQ Schools, Roni leads workshops and speaks in schools nationally and abroad. He is an expert in helping educators become more mindful, connected, and playful. Early in his career, Roni struggled with the high stresses and demands of teaching even losing touch with why he wanted to be a teacher in the first place. It was so painful that he finally discovered the power of integrating mindfulness, emotional intelligence, and positive psychology in his own life as well as in his classroom and felt called to share this new approach with the world.

**Day Two – Thursday, August 3: Special Presentation with  
KATIE ANDERSON, Conscious Classroom Management**

**Behavior on the Brain: Bringing Out the Best in Students and Teachers** is an interactive workshop that addresses common behavioral and academic issues educators struggle with when working with students. The training will give beginning and veteran K-12 educators and expanded learning support staff practical, multiple hands-on strategies for successfully managing student behaviors in any learning environment. In addition educators will learn easy to implement engagement, participation, and attention techniques as well as the brain research that supports them. In this training participants will learn how to:

- Reduce student arguing and defiance
- Positively connect with and motivate challenging students
- Teach procedures that will maximize student attention and reduce wasted time
- Use consequences to teach personal responsibility and deescalate confrontations
- Actively engage reluctant learners
- Increase participation and attendance

**LAUNCH** your year with various engaging workshops that will ignite your creativity for a successful program that keeps your students coming back for more!
