

# ELO-P DATA SNACKS

“Bite-sized” data showcasing ELO-P’s impact across California.

In 2021, Governor Gavin Newsom and the Legislature established the Expanded Learning Opportunity Program (ELO-P), which provides ongoing state funding of \$4 billion (as of Fiscal Year 24-25) to school districts and charter schools for Expanded Learning programs. California’s students and families have benefited from this investment, however, statewide impact data is not yet available. The Research Evaluation and Strategy Committee (RESC) convened by the California Department of Education, Expanded Learning Division (CDE EXLD) in partnership with the California AfterSchool Network (CAN), gathered a diverse group of interest holders that came together to identify and collect existing data, and elevate stories of impact, thus the ELO-P Data Snacks were born.

## ELO-P IS A GATEWAY TO INCREASED ACCESS & QUALITY

2022-2023 enrollment data from EdData.org shows that 3.3 million students in California are funded as “unduplicated pupils.” An unduplicated pupil is defined as a student enrolled in a school district or charter school who is classified as an English learner, eligible for a free or reduced-price meal, or is a foster youth. A school’s unduplicated pupil percentage affects how much funding they receive for ELO-P and other funding streams designed to promote equity and access to high quality opportunities for youth.

## REGION 11: Los Angeles County

### COMMUNITY PARTNERSHIPS: LOS ANGELES

At Bright Stars Schools in Los Angeles County, community-based organizations like Afterschool All-Stars manage various before school, afterschool, and intersession programs. Since ELO-P, their offerings have expanded to include health, nutrition, fitness, homework help, academic support, leadership, character development, community service, STEM, and the arts.

Principals have observed that due to ELO-P, there has been an increase in student engagement with the school, and students are more eager to participate and develop their leadership skills. Principals believe that program supports students’ academic progress, helps them build meaningful relationships with caring adults (staff), and strengthens their connection to the school environment.

“The supplemental enrichment activities bring the joy of learning to the students and increase school connectedness also. Students develop greater friendships across grade levels and peer groups when they participate in these activities.”

SCHOOL PRINCIPAL,  
BRIGHT STAR SCHOOLS

5889 students participated in Bright Stars Schools Afterschool All-Stars programming.

A total of 224 services were offered in Bright Stars Schools.
