Join us for a virtual discussion around the next generation of expanded learning and afterschool.

Learn groundbreaking research and analysis on afterschool.

A new paper from researchers Joseph Durlak and Roger Weissberg asserts that certain high quality afterschool programs are associated with significant increases in academic achievement and attendance, as well as significant improvements in behavior.

Discuss the future of expanded learning and afterschool.

Join other participants in exploring the future of expanded learning and afterschool. New resources, tools and opportunities to engage will be available.

Learn more about the virtual event and be part of the future!

The conversation launches The Expanded Learning and Afterschool Project, a 50 state initiative dedicated to helping schools and communities leverage the time beyond school to accelerate student achievement by sharing research and best practices. This initiative is supported by a coalition of funders led by the Charles Stewart Mott Foundation.
