## QUICK GUIDE: High School After School Program Quality Self-Assessment Rubric

The QSAR Tool provides after school programs serving older youth with a clear and concise way to start important conversations about program quality. The QSAR Tool facilitates program quality improvement and support through a self-directed process, rather than through external monitoring. The QSAR Tool is meant to support a reflective process in which program staff and stakeholders explore their own programs and work collaboratively to develop strategies to enhance policies, procedures and practices. The QSAR Tool will help program staff and stakeholders assess their program and identify their challenges. As a result, the QSAR Tool is appropriate for formative assessment and building teams that will work toward program improvement. The QSAR Tool should not be used as an external evaluation measure.

Steps to Using the QSAR Tool	What the QSAR Tool is for	The QSAR Tool can be used in many ways	Using the QSAR Tool for Program Planning & Professional Development	Review the Results Develop an Action Plan
<p>After school programs must decide how best to use the QSAR Tool. There is no one right way to use it!</p> <p>Note: It is critical to set the stage for the self-assessment team, so that team members understand the purpose of the process. Be intentional when communicating the purpose and process.</p> <p>Use the following steps to determine how your program can use the QSAR Tool to assess program quality and develop an action plan for continuous improvement.</p> <p><b>STEP 1:</b> Select the Quality Elements you wish to assess and form a Self-Assessment Team</p> <p><b>STEP 2:</b> Conduct the self-assessment using the quality rubric</p> <p><b>STEP 3:</b> Identify areas for improvement and develop an action plan</p> <p><b>STEP 4:</b> Implement the Action Plan (Adopt as needed)</p> <p><b>STEP 5:</b> Assess the success of the action plan and the achievement of intended improvements</p>	<p><b>Engage</b> key stakeholders in meaningful conversations about program quality and continuous improvement.</p> <p><b>Encourage</b> after school program stakeholders to think about the ways in which they can support high quality after school programming for older youth in their community.</p> <p><b>Generate</b> an action plan that identifies the immediate, mid-range, and long-term professional development and technical assistance support needed to enhance program quality.</p>	<p><b>Review</b> single sections of the QSAR Tool during staff meetings to inform program planning and professional development.</p> <p>Use several sections of the QSAR Tool as a staff survey to assess multiple dimensions of program quality.</p> <p><b>State-funded after school programs cannot overlook grant compliance requirements. For more information, visit California Department of Education After School Programs Office web site at <a href="http://cde.ca.gov/lb/ba">cde.ca.gov/lb/ba</a></b></p>	<p>When developing an action plan based on the QSAR Tool ratings, after school programs should consider the following:</p> <p><b>What is the current Performance Level in our program?</b> Practices that receive an Early rating likely need to be addressed in the short-term. Practices that receive a Developing rating likely need additional attention within this current school year, and practices that rated Mature should be sustained.</p> <p><b>How urgent is the need to address the practice?</b> Practices that have direct impact on participants' health and safety or that are closely linked to program goals or compliance issues should take priority in the action plan.</p> <p>Each program quality practice includes a section to accurately record Action and Evidence supporting the performance level selected.</p>	<p>Developing on local context, after school programs may choose to incorporate findings from the quality self-assessment process into an action plan for individual sites, for districts or organizations as a whole, or both. Based on the team's assessment findings, members will develop an action plan to improve practice quality where needed and to sustain their strengths.</p> <p>It will be important to clarify the factors that contributed to the Performance Rating selected.</p> <p><b>For practices that need improvement, explore:</b> At what level does the issue occur? Which part of the program requires further improvement? The solution has which key elements? How complex is the solution?</p> <p><b>For practices that need to be sustained, explore:</b> What factors make this practice strong? What is the need to sustain this practice? Can we use the strength to improve practice in some other dimension?</p> <p><b>Identify Next Steps:</b> Determine Short, Medium, and Long-term Priorities.</p>

# INTRODUCTION TO THE PROGRAM QUALITY SELF-ASSESSMENT RUBRIC

**T**he High School After School Quality Self-Assessment Rubric (QSAR) was created to support the growing number of high school after school programs and establish a framework to measure program outcomes and quality in the State of California and across the Nation. In an era of stricter accountability and limited financial resources, the sustainability of an after school program depends upon a program developing support from their stakeholders—the schools, students, their families, local communities, and community partners. Across the Nation, some programs thrive while others struggle. The QSAR provides a common language and framework for various levels of program quality. The rubric allows programs to self-assess their quality in various areas and make a plan for program quality improvement.

A quality after school program not only meets the needs of students, but it also meets the needs of its stakeholders—the school, funders, community partners, and parents. The QSAR is a tool that is intended to help school and district personnel, after school program professionals, and community and business partners look at their local programs from a 360 degree perspective with an eye towards continuous program quality improvement. It allows stakeholders to examine how their program aligns with expectations and reflects identified promising practices from the field.

## FOR THE NATIONAL AUDIENCE

Throughout this document you will see references made to “ASSETs” programs and staff. This document was developed in conjunction with the California Department of Education and addresses some specific requirements for California programs awarded 21st Century Community Learning Centers (CCLC) After School Safety and Enrichment for Teens (ASSETs) funding.

**The Quality Self-Assessment Rubric** is a comprehensive self-assessment of high school after school programs. It allows after school program staff, site coordinators, program directors, district personnel and other key stakeholders to assess their program and create a plan for program quality improvement.

**It is important to note:** Not all levels of stakeholders within an after school program will need to address each area or item of the rubric. Each of the stakeholder groups need to have an awareness of each area and item within the rubric, but need only work in areas pertinent to their day-to-day work and reach.

## OVERVIEW OF THE PROGRAM QUALITY SELF-ASSESSMENT RUBRIC

The QSAR helps programs analyze where they are currently and serves as a roadmap for program improvement in relation to the following five main categories and eight elements/disciplines:

### MAIN CATEGORIES

Schools  
Students  
Operations  
Program Design  
Collaboration

### ELEMENTS/DISCIPLINES

**School Partnership:** Is the program an integral part of the school as measured by administrative and school staff support, and its alignment with the instructional day?

**Student Achievement:** Does the program have high expectations to increase student achievement and close the achievement gap by offering academic and personal supports?

**Youth Development and Partnering with Youth:** Does the program demonstrate a strong youth development component where the program's young people experience supportive peer-to-peer relationships, participate in engaging learning activities that promote 21st Century skills, and have a real voice in the operation of the after school program?

**Program Operations and Staffing:** Are the operational policies and procedures of the program designed to ensure delivery of an effective array of services to the young people it serves as measured by program vision and management, staff recruitment, and training?

**Data Collection and Program Evaluation:** Does the program have access to data, know how to reflect on the data with the instructional day, and then use that understanding effectively to identify student and school needs as well as to articulate program and student accomplishments to all stakeholders?

**Program Design:** Is the program designed to ensure that all of the required components are available and that students participate in experiential learning activities that will equip them to be successful both now and when they pursue future career, educational, or workforce opportunities?

**Program Attendance:** Is the program attracting not only sufficient numbers of students to remain viable, but also is it attracting the students most in need of program services?

**Collaboration and Community Engagement:** What kinds of relationships does the program have with local governmental, community based organizations, and small businesses to develop opportunities for high school youth, not only at the school site but especially in the greater community?

### PERFORMANCE LEVELS

Each section of the rubric has three categories to measure where the program is in its overall development: **Early**, **Developing**, and **Mature**. Using the Early, Developing, and Mature categories allows interested stakeholders the opportunity to make an honest assessment about where they believe their program currently is. One category is not necessarily better than another. No category becomes "Mature" without passing through the earlier stages.

### EVIDENCE AND ACTION DOCUMENTATION

Each section also contains a column for Evidence and a column for Action. An honest assessment requires that the rater look for the evidence of the characteristics described in each section and accurately record the action taken to support the measurable evidence. Once programs have identified different strengths and weaknesses, they can use that information to drive program improvement efforts.

### ACTION PLAN

Program improvement won't happen without a carefully considered plan. Assessment and reflection represent the first steps in the process. Meaningful change and improvement happens only after program stakeholders create an action plan (See APPENDIX A for form) and track their progress towards the goals they established.

# USING THE PROGRAM QUALITY SELF-ASSESSMENT RUBRIC

The following example demonstrates how the QSAR might be used to look at how a program promotes student achievement.

## Continuum Definitions

	EARLY	DEVELOPING	MATURE	EVIDENCE	ACTION
Continuum Definitions	Stage of program development where there is no or very limited development of recognized best practices for working with high school and older youth.	Stage of program development in which some recognized best practices for working with high school and older youth are present although there may be elements which could clearly be improved.	Stage of program development that demonstrates consistent use of recognized best practices working with high school and older youth and can serve as a model for other programs.	Cite examples of: material items, documents, data results, etc., that clearly indicates work accomplished in the respective stage.	Record what actions you took that support your mark, and can also be of support to your cited evidence?

## DIRECTIONS

1. Mark the appropriate stage in the continuum that accurately reflects where the program is right now.
2. Record the Actions taken to support your mark.
3. Cite the Evidence created that clearly indicates outcomes of work in the respective stage.

## Sample: QSAR Program Quality Element/Discipline

STUDENTS					
STUDENT ACHIEVEMENT					
	EARLY	DEVELOPING	MATURE	EVIDENCE	ACTION
Program Environment	<ul style="list-style-type: none"> <li>The after school program culture is not ready to support high expectations for student achievement.</li> </ul>	<ul style="list-style-type: none"> <li>The after school program culture is apparent and is supporting high expectations for student achievement.</li> </ul>	<ul style="list-style-type: none"> <li>The after school program culture influences the regular school day and has multiple avenues of support for high expectations for student achievement.</li> </ul>	<ul style="list-style-type: none"> <li>Program observations, interviews with staff and participants, programming activities, plans, and products, participants' grades, test scores, college acceptance, and graduation rates.</li> </ul>	<ul style="list-style-type: none"> <li>All program staff and participants promote strategies to build a "Can do" culture in which academic achievements, e.g. improved grades, higher test scores are recognized and celebrated.</li> </ul>

**Whether a program is at an early, developing, or mature stage will depend upon the evidence (or the lack of) that it can produce to justify a particular rating. Student achievement is a complex concept.** According to the rubric a "Mature" program has a culture that "influences the regular school day" and offers "multiple avenues of support" for student achievement. Such a program can provide evidence that it has a well-trained staff team who work closely with school staff and use student data to ensure students receive the necessary academic assistance to address identified gaps in their learning preparedness. Likewise, students also receive encouragement from program staff, peers, and school staff to improve and the entire school community recognizes that improvement when it happens. In other words, a "Mature" rating defines the vision that all programs should be striving to attain. A program at the "Developing" stage will have some of the pieces typical of a mature program. For example, it may be increasing its use of school data to identify students' learning gaps, but staff may not completely understand how to best utilize that data. It may also lack a system to recognize and celebrate students' improvements as they meet different learning benchmarks. But having identified where it is currently falling short, it allows the program to create an action plan to add or strengthen any weak or missing links. When a program finds that it is at an "Early" stage, it can begin to have discussions with stakeholders about how they define quality in that category and what that quality would look like in practice. This allows program staff to create a plan that will improve the program outcomes and move it towards higher quality.

**Evidence** can come from many sources. Evidence can be observations of program activities and/or conversations with program staff, school staff, participants, and parents. In the example above, the category raises the question of how the program's environment contributes to student achievement. Consider what internal and external factors make a positive work or learning environment. Consider whether important factors like positive adult/participant and participant/peer relationships are in place. Without these, it is difficult to see how participants will be motivated to perform to the highest degree possible.

**Action** includes any processes or activities that have been implemented to bring about improvement or change. The Action box is where it is important to record specific actions taken that support your level of achievement and can also support the cited evidence. It is critical to examine past successes when engaged in planning for the future.

Using the Quality Self-Assessment Rubric will not magically produce quality. Properly used, however, it will provide school personnel, program staff, and program stakeholders a set of benchmarks to assess the quality of their own program and provide a consistent standard which all programs can use to develop the most effective strategies to serve our high school youth. In assessing a program's quality status, the QSAR is not intended to be prescriptive. Rather it's intended to serve as the basis upon which all stakeholders can have a conversation about their vision for a quality program and create a roadmap to move towards that vision.

## Sample: Action Plan

Based on using the above Program Quality Element Example the following table demonstrates what the Evidence and respective Action Plan could look like for each stage on the continuum. (It is best to read this table from Top to Bottom under the columns of Early, Developing, and Mature.)

	 <b>EARLY</b>	 <b>DEVELOPING</b>	 <b>MATURE</b>
Program Environment	<ul style="list-style-type: none"> <li>The after school program culture is not ready to support high expectations for student achievement.</li> </ul>	<ul style="list-style-type: none"> <li>The after school program culture is apparent and is supporting high expectations for student achievement.</li> </ul>	<ul style="list-style-type: none"> <li>The after school program culture influences the regular school day and has multiple avenues of support for high expectations for student achievement.</li> </ul>
Evidence	<ul style="list-style-type: none"> <li>Program activities are largely remedial.</li> <li>Little interaction between staff and participants.</li> <li>Participants largely work alone.</li> <li>There is little communication between school staff and program staff about participants' academic progress.</li> <li>Physical environment is sterile.</li> </ul>	<ul style="list-style-type: none"> <li>Program staff is aware of participants' academic needs and strive to help them.</li> <li>There are positive interactions between program staff and participants.</li> <li>Participants' successes are recognized when they demonstrate improved performance.</li> <li>Participants can choose to work alone or collaboratively to complete assignments.</li> </ul>	<ul style="list-style-type: none"> <li>Program offers a wide range of activities and services that allow participants to improve areas of weakness and develop new skills.</li> <li>Program stakeholders regularly share accomplishments of program within both school and community.</li> <li>Program staff and participants reach out to students within the school community who are at risk of academic failure.</li> </ul>
Action Plan	<ul style="list-style-type: none"> <li>Develop a system to communicate with participants' teachers and track participant's academic progress.</li> <li>Provide professional development for staff to use collaborative learning techniques.</li> <li>Have participants design and decorate space.</li> <li>Celebrate participants' successes.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure that program academic and enrichment activities include information about how learning has applications in real world situations.</li> <li>Develop system so participants learn to set goals and create benchmarks to track their improvement.</li> <li>Promote college and career awareness so that participants are focused on their future.</li> </ul>	<ul style="list-style-type: none"> <li>Assess program offerings to ensure participants are learning skills that will enhance their readiness for post secondary educational and/or career opportunities.</li> <li>Celebrate academic accomplishments of program participants in school and local community.</li> <li>Develop a case management approach for participants who have major learning gaps.</li> </ul>

## QUALITY SELF-ASSESSMENT RUBRIC (QSAR)

# GET INVOLVED!

## Subscribe to the Network Newsletter

This free electronic newsletter contains information and resources to assist after school programs. These resources include after school funding opportunities, state and federal after school policy information, statewide and National professional development opportunities, tools to build quality practice, and timely after school research.

Subscribe at at  
[www.afterschoolnetwork.org](http://www.afterschoolnetwork.org)

## Join the Older Youth Committee

The Older Youth Committee is committed to amplifying the needs of older youth by supporting innovative promising practices among middle and high school after school practitioners. Committee meetings offer participants the opportunity to learn from experts in the field and share resources and promising practices with statewide colleagues. Committee meetings happen every other month via toll free telephone conference.

Join at [www.afterschoolnetwork.org](http://www.afterschoolnetwork.org)

## Access the Older Youth Programs Resource Web Page

This page contains resources to assist after school programs for older youth. The resources include promising practices that support older youth programs, research to assist grant writing and increasing research-based promising practices, as well as links to recorded trainings and workshops for high school and middle school site coordinators, and more.

Access at [www.afterschoolnetwork.org/older\\_youth](http://www.afterschoolnetwork.org/older_youth)

## Put Your High School Program in the High School Directory

The High School After School Program Directory assists practitioners in identifying statewide high school after school programs.

The goal of the directory is to create a network of statewide practitioners to share promising practices and learn from others with a similar focus area.

Put your program in the directory at  
[www.afterschoolnetwork.org/older\\_youth](http://www.afterschoolnetwork.org/older_youth)

## Access Additional High School Publications
