- Using the data collected and the *Quality Standards for Expanded Learning Programs in California*, describe the program’s strengths.

**3. Section II. Quality Program Improvement Plan**

Programs should reflect on what ways it is minimally addressing aspects of all 12 standards. For the purposes of the Quality Program Improvement Plan, programs should address **two to three** high priority needs of the expanded learning program. **It is recommended for sites engaging in this process for the first time to only address one standard.** Each site should identify and define the goals, objectives, and outcomes to be achieved (along with concrete activities, identification of individual[s] responsible, and a reasonable timeline for meeting those goals). An example is given for reference.

- **Goals:** Goals should be aligned with the Quality Standards and tailored to the program site based on data and information collected from a recent assessment.
- **Specific objectives and outcome measures:** Include ways in which goals can be accomplished. Describe the specific objective(s) to address Quality Program Improvement goals. Objectives should be measurable and quantifiable (i.e., the program will provide the opportunity for students to actively share their viewpoints and interests by holding four student meetings between January and April 2015.)
- **Activities:** Describe any and all activities, along with (1) the individual(s) responsible for carrying out the activity; (2) the given timeline date(s); and (3) the plan should also identify any support and/or technical assistance (TA) the program and its staff may need to help meet the goals and objectives.
- **Support/TA:** The table below includes examples of the types of support/TA that may be requested. For more information about the core strategies for TA, please refer to the ASAP Quality Framework located on the ASAPconnect Web site at <http://www.asapconnect.org/asap-quality-framework>.
