Active and Engaged Learning

Please provide a short description of your workshop around this quality standard:

In this workshop, Every Monday Matters will share the secret sauce that makes the You Matter K-12 program so successful in helping educators and students understand how much and why they matter. Educators will have the opportunity to experience the power of EMM's engaging learning approach through hands-on experiences and collaborative design challenges that will expand the educators' horizons. From there, educators will work together to identify how to take these best practices forward into everything they do for their students' benefit.

Please indicate the audience this workshop is intended for (mark all that apply and specify in description if "other"):

- Site Staff- Elementary
- Site Staff- Middle School
- Site Staff- High School
- Administrators (e.g.- Program Directors, Principals, etc.)
- Other

Skill Building**Please provide a short description of your workshop around this quality standard:**

There is no shortage of student leadership programs that promise to provide students with the practical skills they need to make them more employable and in turn making them and our communities and country more successful.

However, at Every Monday Matters, we're challenging ourselves and educators to broaden our thinking. We see the need to incorporate into our mission to equip students with 21st century skills, something that reaches them on a much deeper level. We believe that every student can and must arrive at a level of understanding as to how much matter to themselves, one another, their families, their schools, the community and world.

In the end, students will be better able to thrive and lead having internalized the important values of "I MATTER," "YOU MATTER." and "WE MATTER."

During this workshop, Every Monday Matters will explore the need for personal transformation at the individual student level that will allow them to recognize and act in a way that demonstrates self and social responsibility. From there, we'll share various learning methods and activities that aid in fostering an environment where students, individually and together, discover the power they have to create their own success while contributing to the success of others and the world around them.
